CLOUD NATIVE DAYS ITALY

CLOUD NATIVE DAYS ITALY 2026

TRANSPARENCY REPORT

Cloud Native Days
Italy 2026 brought the community together for **two full days** of cloud native innovation, collaboration, and inspiration.

We're proud to have built on the momentum of past editions: expanding the conversation, the topics, and the connections that make our ecosystem thrive.

TWO DAYS.
18-19 MAY 2026
ONE COMMUNITY.

WHO WE ARE

CND ITALY

Non-profit, volunteer-run event organized by the Italian Cloud Native & Kubernetes Community

A **safe, vendor-neutral** space where practitioners share real stories, hard lessons, and practical knowledge, from professionals and newcomers alike

Dedicated to the **ever-growing Italian community** that believes in open source and Cloud Native innovation

Strongly **connected to the CNCF ecosystem**, with CNCF Ambassadors and active contributors to CNCF, LF, and European cloud-native communities

WHY WE DO IT

I've been part of the organizing team for Cloud Native Days Italy for 5 years now, and every time I realize how this event keeps **getting bigger**, **more structured**, and **more vital** for all of us.

MICHEL MURABITO

Tech Evangelist + CNCF Ambassador + Cloud Native Days Core Organizer

Product Marketing Manager + CNCF Ambassador + Cloud Native Days Core Organizer

SARA TRAPPETTI

At Cloud Native Days Italy every year, I'm reminded that in Italy and across Europe, we have **incredible minds and hearts**, and Cloud Native Days events are the places where these people come together to talk and innovate.

There's something special about the CND atmosphere: **constant conversations**, **shared experiences**, **lessons learned**, **challenges discussed openly**, and people genuinely excited to build, learn, and grow together. It never really feels like "networking". It feels like **community**.

ANDREA GIARDINI

Cloud Native Consultant + CNCF Ambassador + Cloud Native Days CFP committee

After some deserved sleep 😴 It's my turn to celebrate Cloud-Native Days Italy 🇮🇹🎉

a wonderful event, thanks Michel Murabito 🚀 Sara Trappetti Andrea ini Graziano Casto and the rest of the organizers.

some great conversations

he audience, I'm quite humbled by the high scores you gave ❤️

his was the first time the Kairos maintainers were all in the same location, and ve managed to have some great conversations about the project and lots of fun! Ettore Di Giacinto Dimitris Karakasilis Itxaka Serrano William Rizzo

And as always this wouldn't have been possible without the support from Spectro Cloud and our colleagues Anthony Hodson and Sergio Lozano

It was a real pleasure to participate

It was a real pleasure to participate as a speaker at Cloud Native Days Italy.
A sincere thank you to my company and my manager Paolo Zilioli for giving me this opportunity, and to Akamas — especially Graziano Casto, Cristian S. B. Fompowou, Stefano Doni, Mauro Pessina, and Davide Giuseppe Siciliano — for outstanding work they do every year to make this event possible and to foster such a strong and growing community.

It was also great to attend several insightful and inspiring sessions:
👉 Artem Lajko and Gianluca Mardente explored the challenges of GitOps at scale, highlighting how traditional hub-and-spoke architectures can introduce significant security risks — especially due to centralized credentials and increased blast radius — and how agent-based, pull-driven models can provide a more secure and scalable approach.
👉 Mauricio (Salaboy) Salatino demonstrated the evolution from cloud-native to agentic applications, discussing emerging architectural patterns and the challenges of observability, as well as how tools like Dapr Workflows and OpenTelemetry help in building resilient and scalable distributed systems.
👉 Jacopo Bufalino addressed the complexity of SBOMs, explaining why current tools often produce inconsistent results when analyzing complex container images and why improving transparency and standardization is key for a secure and compliant software supply chain.

On May 19th I had the pleasure of attending Cloud-Native Days Italy 2026 in Bologna: an intense, energizing day! The event ran over two days, but I could only make it f
great talks, g

great talks, great people,

The day kicked off with the keynote "Open Source at CERN" by Giacomo Tenaglia a fascinating look at how one of the world's most complex scientific environments embraces open source. Then came "Agenti AI in Platforms" by William Rizzo.. because yes, AI is absolutely everywhere these days 😅

Before diving into the others sessions, for the first time in person, me and Artem Lajko held a book signing of our book"Implementing GitOps with Kubernetes" (https://lnkd.in/ePNKzg3X) : 25 copies gone in minutes, lots of great questions, and a really warm crowd. Super!

Right after, Artem Lajko and Gianluca Mardente delivered a sharp talk on "GitOps at Scale" , very relevant for anyone operating complex multi-cluster environments. I also really enjoyed Chiara Corrado's session on the open source philosophy adopted by Aruba Cloud, and wrapped up my day with Mauro Morales ' thought-provoking "What Should a Cloud-Native OS Look Like?" and a deep dive into East-West mTLS without sidecars, using zTunnel on Cilium 1.19.

Partecipare a eventi come il Cloud-Native Days Italy di Bologna non è s
"formazione": è investimento reale nelle competenze, nella visione e nella qualit
del lavoro tecnico.

In pochi giorni si ha accesso a contenuti di altissimo livello, confronto diretto con professionisti del settore e una panoramica concreta su strumenti, pratiche e trend che difficilmente emergono con la sola operatività quotidiana. È uno di quei contesti in cui torni a casa con idee applicabili da subito.

investimento reale nelle competenze,

Quest'anno ho avuto il piacere di partecipare da "privato". Una scelta che rifarei senza esitazioni. Perché al di là del contesto lavorativo, restare aggiornati è una responsabilità personale, oltre che professionale.

Eventi così non sono un benefit.
